## VALUE ADDED COURSE ON "MUSHROOM CULTIVATION"

Organized by Department of Botany

Botany department of Govt. Arts and Commerce Girls College, Raipur, (C.G.) organized a 31-Hours VALUE ADDED COURSE on "Mushroom Cultivation" from 18<sup>th</sup> April to 25<sup>th</sup> April 2021. Mushrooms are excellent sources of vitamins and minerals. In view of their high food value to man and their medicinal properties mushrooms can help in solving the problems of malnutrition and diseases. It is especially important to have strong immunity power of our body. It is due to the corona epidemic that people have started paying more attention to their immunity. Due to this the demand of mushroom increasing day by day. Therefore, this course was introduced to understand the students the specifics of its cultivation. The aim of this course was to provide complete information on mushrooms to students.

The course attracted a large group of students from almost all domains like Science, Arts, Commerce and Home Science making the registration count to 215 including U.G. and P.G. Alongside with cultivation, the students were groomed with Structure, Medicinal importance, Types, Reproduction, Processing, Marketing and delicious, healthy Recipes of Mushroom. A total of 07 Resource Persons from all domains took a solid responsibility and delivered effective lectures making the students proficient with all categorical skills. Consistent assignments as well as a Final exam was also conducted based on which the students received 'A' and 'B' grade certificates as per their performance.

A feedback was also taken regarding the course and the lectures delivered by the resource persons to enhance the course as well as lectures on which 69.8% gave "Excellent" rating followed by 30.2% rated "Good". Students suggested to organize such courses again in the future to make them more profound and efficient in real-world scenarios.

## VALUE ADDED COURSE ON "MUSHROOM CULTIVATION"

Organized by Department of Botany

**Dr P K Patra, Medicinal Importance of Mushroom**

**Nutraceuticals**

- In addition to the nutritional components found in edible mushrooms, some have been found to comprise important amounts of bioactive compounds.
- The bioactive substances found in mushrooms can be divided into secondary metabolites (acids, terpenoids, polyphenols, sesquiterpenes, alkaloids, lactones, sterols, metal chelating agents, nucleotide analogs, and vitamins), glycoproteins and polysaccharides, mainly  $\beta$ -glucans.
