

DEPARTMENT OF PSYCHOLOGY-

STUDY TOUR/ FIELD VISIT

A field visit or excursion is a journey by a group of people to a place away from their normal environment. The purpose of the trip is usually observation for education, non-experimental research how to provide students with experience outside their everyday activities. Students of masters of department of psychology visited to Akanksha School .

Akanksha school is a special school catering for students who have special educational needs due to learning difficulties, physical disabilities or behavioural problems. It is specifically designed', staffed and resourced to provide appropriate special education for children with additional needs' .Few Students of M.A. PSYCHOLOGY IV semester visited Akanksha school on **27 January 2020**.

STUDENTS OBSERVATION

- School and programs are for kids who have challenges or disabilities that interfere with learning. They provide support that's not normally provided in general education programs.
- Schools and programs tailor learning to address each child's unique combination of needs. Adaptations are made to allow kids to meet age-appropriate educational goals.
- They offer a wide range of approaches and services. This may include smaller classes, individualized learning, one-on-one support, self-contained classrooms, resource rooms, and learning aids.

Another field visit was performed in the form of an outreach programme. Outreach is an activity of providing service to end population or stakeholders who might not otherwise have access to the services. It is an activity where organisations and institutions rich out to share what research or innovation in teaching is done at an institute. Sometimes, it is also necessary to travel to space which otherwise might not have been accessible to them, with a sole purpose to learn something unique. Pt. Ravishankar Shukla University and School of studies psychology jointly organised an outreach program on 16 October 2019. Students of M.A. (Department of psychology) of government arts and commerce girls' college, Devendra Nagar along with faculty Dr. Ushakiran Agrawal and Dr. Anjana Purohit visited University for this program.

TUBEROUS ROOT

- 1) Stem tubers form thickened rhizomes (horizontal connections between organisms).
- 2) Common plant species with stem tubers include potato and yam.
- 3) Some sources also treat modified lateral roots (root tubers) under the definition; these are encountered in sweet potato, cassava, and dahlia.
- 4) The swollen roots do not assume a definite shape
